A Message to my
Members of Congress

We are on the road to major global migrations by 2040.

Cutting fossil fuel emissions is our only path to stability.

Take fossil emissions seriously - I do!

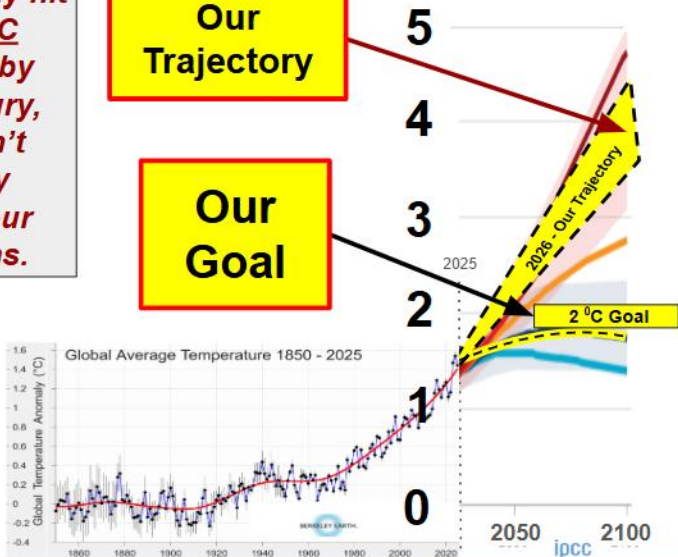

A Message to my Members of Congress

We are Over-Heating the Planet - FAST!

We will likely hit 2-3 deg C increase by mid-century, if we don't abruptly change our emissions.

Our
Trajectory

Our
Goal

Our only real line of attack is to drastically cut fossil emissions. We cannot control Temperature.

We can only control Emissions.

This is devastating.

A Message to my Members of Congress

Take a close and honest look at our Fossil Emissions trajectory vs what is required to limit Global Heating to the High-Risk 2°C of the Paris Agreement.

Urgent, globally-coordinated action is required.
